

FV11 BOX TURNER

DESIGN

The box turner is used where it is necessary to change direction or orientation on the boxes.

The box turner is designed to be integrated in existing conveyor systems.

The box turner can be designed to accommodate all directions of travel.

The customer at the center of attention

The boxturner is designed according to customer specifications, and is adaptable to most systems.

At CK Teknik we draw and possibly animate all products in 3D, which will cause unforeseen mechanical problems already to be identified and corrected in the design phase.

Options

Direction according to customer specifications.

Pneumatic pusher .

Roller, belt or chainconveyors.

Boxes can be flipped, so it is possible to place absorptionpads.

sorting tables, checkweighers, printers and stackers can be placed after the boxturner.
