

GS10 EPS GRANULATOR

DESIGN

The two-step granulator GS10 is specially designed for granulating polystyrene waste for reuse in a molding machine.

The waste material is manually fed into the opening. The finished granules can be transported further by fan and piping.

The GS10 is equipped with two slow-speed rotors to ensure dustless and comparatively noiseless performance.

Options

Interchangeable sieves for the wanted material size.
Screen size 5-10 mm.

Technical data:

Electrical connection:

8 kW

Capacity:

5-15 m³/h

Waste size max :

Width = 1000mm.

Height = 250mm.
