

## SI78 SILOS

### DESIGN

Silos made of antistatic woven synthetic material, an essential feature in EPS / EPP production.

Silo frame made of galvanized steel, fully demountable.

Silo-size and design according to customer specifications.

Inlet and outlet are designed and positioned according to customer specifications.

Mechanical level-detectors as standard at top and bottom.

### The customer at the center of attention

The silos is designed according to customer specifications, and is available in various sizes and shapes.

At CK Teknik we draw and possibly animate all products in 3D, which will cause unforeseen mechanical problems already to be identified and corrected in the design phase.

### Options

The silos can be delivered with various options:

- Weight transmitters
- Zipper installed in bottom of silo for easy acces.
- Custom top angles to fit building specs.
- Inlet at side or top
- Moveable with rubberwheels
- Outletboxes in various designs
