

SM51-52 MILL EPS/EPP

The mill is designed to transport and fine break the pre-broken material from the granulators (pre-breakers).

The mill breaks the material to desired size, and transports it to a silo/mixer unit for recycling.

Painted in white.

Technical data:

Electrical connection:	3 x 400/480V, 50/60Hz, 15 - 37 kW
Density:	10 - 55 g/l
Capacity:	10 - 15 m ³ /h (Depending on density/screen size)
Air transport:	0,1 - 0,5 m ³ /s (Depending on Back pressure)
Pipe Connection:	Ø160 / Ø200

Features:

- Interchangeable screen sizes 6-30 mm.
- Sound absorbing housing (Option).
- According to CE Standard.
